About Our Website

Welcome to our Car Selling Application! This platform is designed to streamline the buying and selling of cars with the power of modern web technologies.

Technology Stack

- **Frontend:** Built with **React.js**, providing a dynamic and responsive user interface for seamless interaction.
- **Backend:** Powered by **Django** and **Django REST Framework** for robust and scalable API development.
- **Authentication:** Secured using **JWT Tokens** to ensure safe and authorized access for users.
- **Database:** Integrated with a reliable database for efficient data storage and retrieval.

Key Features

- User authentication using JWT for secure login and token refresh functionality.
- Comprehensive car management including adding, updating, deleting, and searching cars.
- Mobile-responsive design using modern CSS techniques for optimal usability.
- Easy-to-use invoice generation for buyers and sellers.
- Pagination and search functionalities for a user-friendly experience.

About Our Team

Our team is dedicated to delivering high-quality solutions by leveraging the latest web development technologies. We take pride in providing a seamless and secure platform for our users.

Thank you for visiting our platform! We are currently under construction and are working hard to bring you new features. Stay tuned for more updates coming soon!

Update Car
